Exploit Machina

A Conversation With
ANDREA MATWYSHYN

Innovation policy and law scholar Andrea Matwyshyn will discuss her article "Exploit Machina," which focuses on situations where broken technologies and broken governance combine to irreparably harm the public. Exploit machina "involves organizational choices to knowingly leverage technology as part of legally problematic conduct, including through various forms of fraud."

Matwyshyn is associate dean for innovation and technology at Penn State Law School. She is a professor of law and engineering policy in both Penn State Law and Engineering, the founding faculty director of the Penn State PILOT Lab and Manglona Lab for Gender and Economic Equity, and affiliate faculty with the College of the Liberal Arts' Bioethics Program.

FRIDAY, FEB. 21
1 p.m., Purcell Reading Room
Lunch will be served on a first-come, first-served basis beginning at 12:45 p.m.
